

Acco2untlite is ideal for SME's and organisations requiring a headline view of their enterprises' consolidated carbon emissions. It is also an ideal entry point for those new to carbon measurement and is easily upgradable to the full Acco2unterprise solution when this becomes necessary.

KEY FEATURES

Data Management

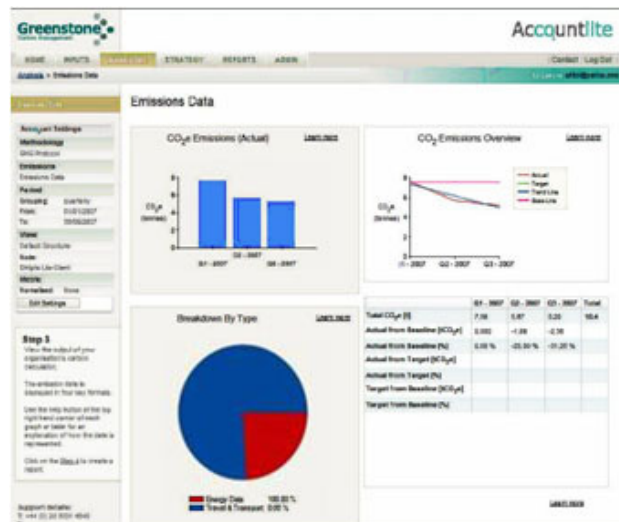

- Emission data upload: manually, spreadsheet
- Full audit trail
- Multiple carbon emission standards
- Predefined emission sources: energy, travel and transport

Decision Support

- Analyse carbon calculation by time and emission source
- View line level source data and documentation
- Set targets and monitor progress

MIS

- Disseminate information across all stakeholders via the web
- Standard carbon footprint report with detailed scope and sources
- Reports exportable to word, PDF and HTML formats

KEY BENEFITS

- Quick start and easy to set up self management tool
- Step by step guide walks clients through the process
- Reduce costs of data capture and verification
- Auditable data integrity checking
- Simple implementation (ASP solution), no capex requirements
- Tracking and maintenance of compliance reporting and standards outsourced
